About ME:

Hi, I'm Nikita, an IT-switcher with a focus on Python backend development. I've gained hands-on experience and study with essential tools like Django, Docker, HTML, and CSS. I can create robust web applications with Django and streamline the deployment process with Docker. Additionally, I have a keen eye for aesthetics and functionality, and I'm always up-to-date with the latest trends and best practices.

I want to continue learning and growing in this fast-paced field.

Soft Skills:

Sociability, responsibility, perseverance, ability to learn quickly, analytical mindset, stress resistance, self-organization, initiative and modesty.

Hobbies:

Computer gaming, snowboarding, rollerblading, camping, football.
